BRAINLY

CONSOLIDATED REPORT

JANUARY 2026

BRAINLYHQ

INTRODUCTORY REMARKS

January 2026 was a turning point for BrainlyHQ, marking a new stage in the development of the entire ecosystem and the server itself. This month saw significant changes in the management structure - Ksperix took over as chairman of the HQ ecosystem and server, assuming responsibility for strategic direction and coordination of further activities. At the same time, a new Management team was appointed, consisting of Kinga, Andrij and Ksperix.

As part of the reorganisation of personnel structures, 17 inactive moderators were removed, which increased the efficiency of the team and clarified the division of responsibilities. At the same time, a moderator database was implemented, providing a foundation for further monitoring of the team's activity, responsibilities and development. These changes were systemic and long-term, aimed at stabilising and professionalising the functioning of BrainlyHQ.

January also brought significant organisational and product progress - the file structure was reorganised and work on the BrainlyLab platform officially began. These activities closed the preparatory stage and opened a new chapter in the history of the server, making January 2026 a turning point for the further, consistent development of BrainlyHQ.

BRANDS / PRODUCTS

BRAIN+

Brain+ is a bot responsible for the task system and collecting BrainlyCoins on the BrainlyHQ server. It was created by developer Wellington and is the technological showcase of the server. Its operation supports user activity and organises gamification mechanisms.

BRAIN+ BETA

Brain+ Beta is a test version of the Brain+ bot, used to implement and verify new features before they are released in the production environment. It allows for safe testing of changes to the task system and BrainlyCoins without affecting the main operation of the server.

BRAINLY LAB

BrainlyLab is a platform for games and mini-games that allows users to personalise their profiles and earn BrainlyCoins. The project has educational value and is currently under development.

BRAINLY LAB

BrainlyLab is a modern project that provides a platform with many Brainly-style miniGames. It also has a main game, which is currently in the conceptual phase. This section will be dedicated to updates on the project and new features!

HOSTING

We are constantly searching for hosting that will ultimately host the BrainlyLab website.

TEAM

The BrainlyLab team is currently being formed – anyone can join and contribute to the project.

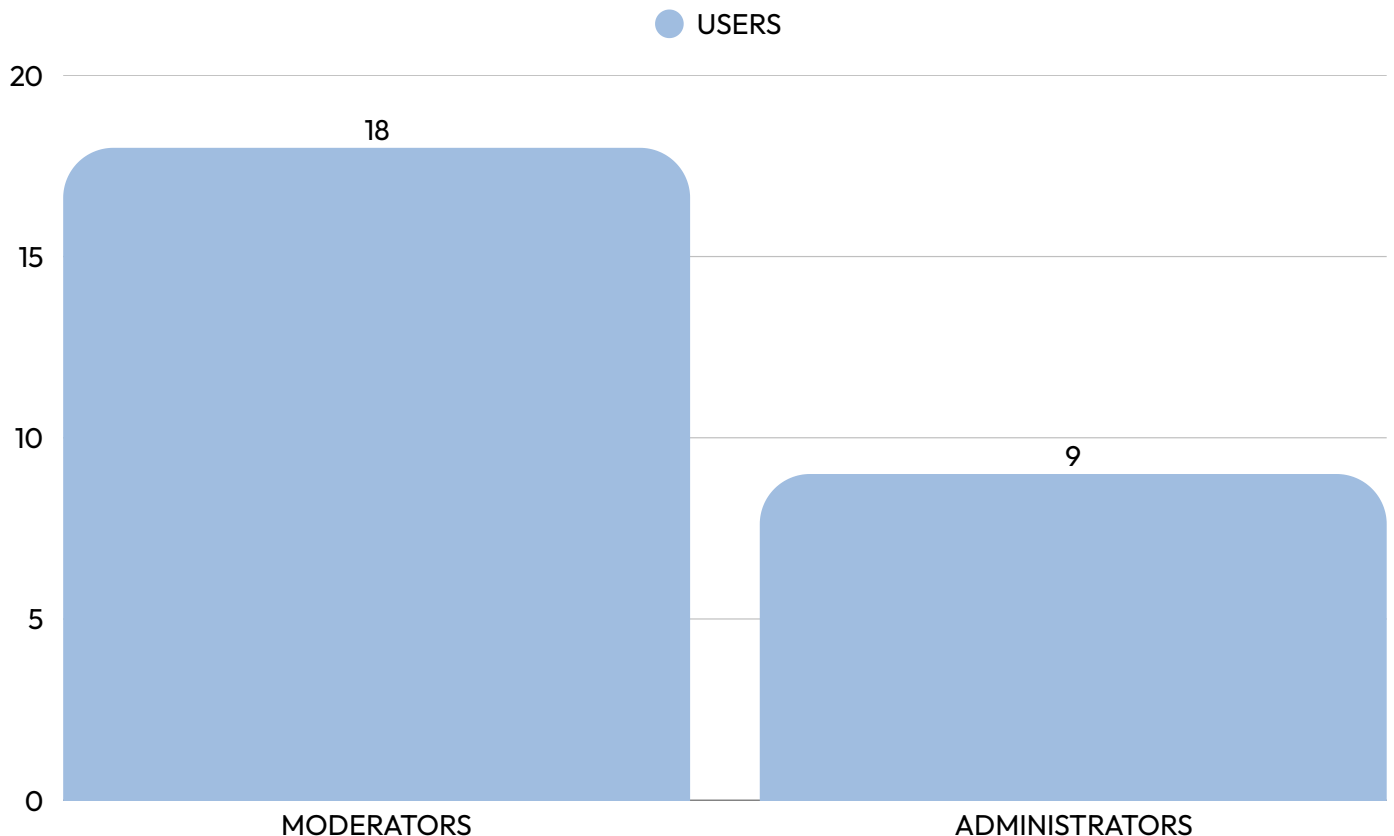

GRAPHICS

The graphics are created on an ongoing basis, and this is the first fully operational section of BrainlyLab.

BECOME PART OF BRAINLYLAB HERE!

MODERATORS & ADMINS

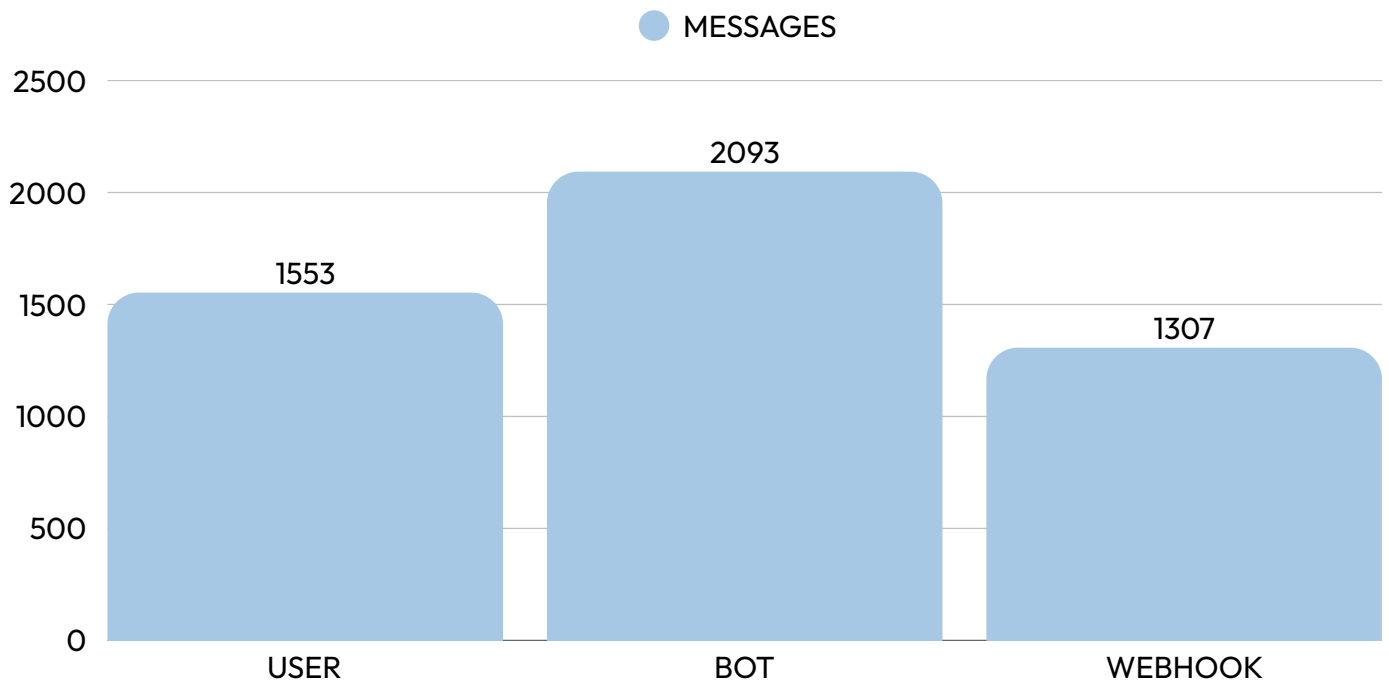

In January 2026, the number of moderators was reduced, including those who had not been active for a long time. Currently, the moderator team consists of 18 people, 9 of whom also serve as administrators. We regularly update our databases and monitor the team's activity to improve cooperation between users and increase work efficiency.

USERS STATISTICS

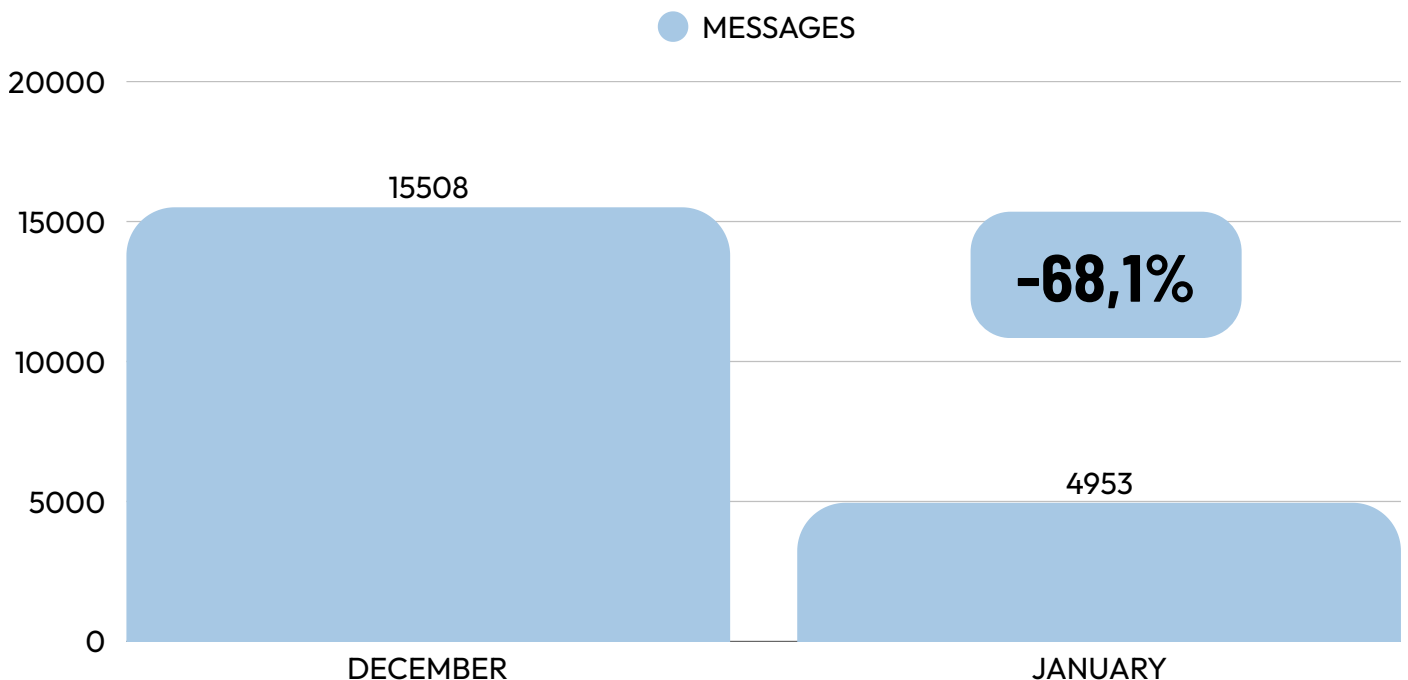

720 USERS

779 USERS

COMPARISON TO PREV.

OVERALL REPORT

In January 2026, a total of 4,953 messages were sent to the BrainlyHQ server, of which 1,553 came from users, 2,093 from bots, and 1,307 from webhooks. A significant part of the communication consisted of multimedia content – 740 messages contained attachments in the form of files, photos or videos. The structure of activity confirmed a high degree of automation with constant user engagement.

The number of server members increased in January. At the beginning of the month (1 January), the server had 720 users, while according to adjusted data from 31 January, there were 779 users. This represents an increase of 59 people, or approximately 8.2% on a monthly basis. The differences from the current reading of 823 users were due to delays in the operation of forecasting stations and data synchronisation.

January was also a month of significant organisational and developmental changes. Work began on the BrainlyLab project, setting a new product direction, and at the same time, the team was reorganised by dismissing several long-term inactive moderators. These actions confirm that January 2026 was a period of consolidation, optimisation and preparation for the further development of BrainlyHQ.

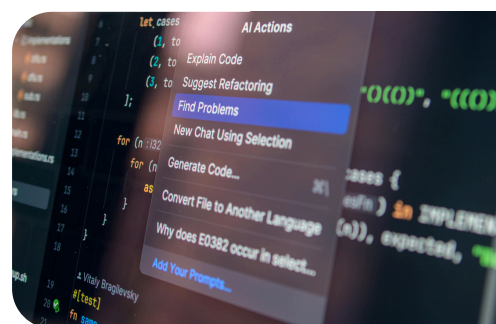

PLAY MINIGAMES FOR FREE!

[Click here](#) and play Brainly miniGames for free today! It is a mini-game platform created by one of our Polish moderators. Help further develop the project and visit his profile [here](#).

JOIN BRAINLYLAB!

Would you like to support a rapidly growing project created by moderators, distinguished members of the community, and Brainly users? [Click here](#) and join today! It doesn't matter what skills you have — everyone is welcome, from IT specialists and graphic designers to creative thinkers.
