BRAINLY

CONSOLIDATED REPORT

MARCH 2026

BRAINLYHQ

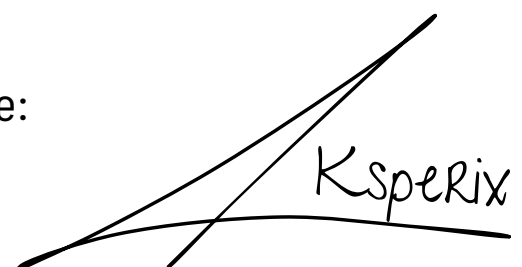

INTRODUCTORY REMARKS

This document opens the consolidated report on the activities of the Brainly HQ server for March 2026 - a space that now functions as a live ecosystem rather than just a communication channel. The past month has brought clear signals of growth: operational activity increased, the server structure was streamlined, and new technical solutions were implemented, including the official Brainly Core bot, which took over key functions related to recruitment, the currency system, and process automation.

March was a period of intense developmental and organizational work. Simultaneously, work continued on the Brainly Lab mini-games platform, which currently involves 16 active contributors. Although the team size decreased by one person, the entire Brainly HQ ecosystem brings together over 30 dedicated collaborators, confirming its cohesion and stability. Additionally, new thematic channels and a refreshed server aesthetic were introduced, improving clarity and workflow comfort.

All described changes are factual and implemented - they are not an announcement, but a summary of what has actually been accomplished. This report documents key decisions, actions, and their outcomes, while detailed analyses can be found on the following pages.

Signature of the Brainly HQ Board Representative:

A stylized handwritten signature in black ink, consisting of a large, sweeping 'K' followed by the name 'sperix' in a cursive script.

BRANDS / PRODUCTS

BRAINLY CORE

Brainly Core is the official, fully operational bot that acts as the central system of the Brainlyserver, fully replacing earlier experimental solutions. There is no beta or test version - Brainly Core runs exclusively in a stable production environment, with all features active and verified. It includes a complete BrainlyCoins economy, a wide range of functional and moderation tools, and a fast, streamlined recruitment system that allows users to progress efficiently. The bot is continuously developed with stability and performance in mind, providing a reliable foundation for everyday server operations and long-term community growth.

CHANGES IN SERVER

- ✓ **Updated overall channel list layout**
- ✓ **Updated overall category list layout**
- ✓ **Updated roles list visual design**
- ✓ **Revised and standardized role separators**
- ✓ **Redesigned server welcome screen**
- ✓ **Added the new Brainly Core system bot**
- ✓ **Introduced a new recruitment system**
- ✓ **New ambassador role assignment process**
- ✓ **Launched official moderator recruitment**
- ✓ **Introduced a user levels and XP system**
- ✓ **Added automated bot response messages**
- ✓ **Added new server map**

BRAINLY LAB

In March, the BrainlyLab project saw a burst of activity at the beginning of the month, with many new additions and updates including the game list, finalised documents, promotional materials, and graphics. Towards the end of the month, the pace of work slowed slightly as priorities shifted to the development of Brainly Core, which became the main focus. The team working on BrainlyLab still numbers 16 people, demonstrating ongoing commitment and ensuring continued progress on the platform's growth and features.

EVERY LESSON MOVES YOU FORWARD.

MODERATORS & ADMINS

BRAINLYHQ TEAM - MARCH

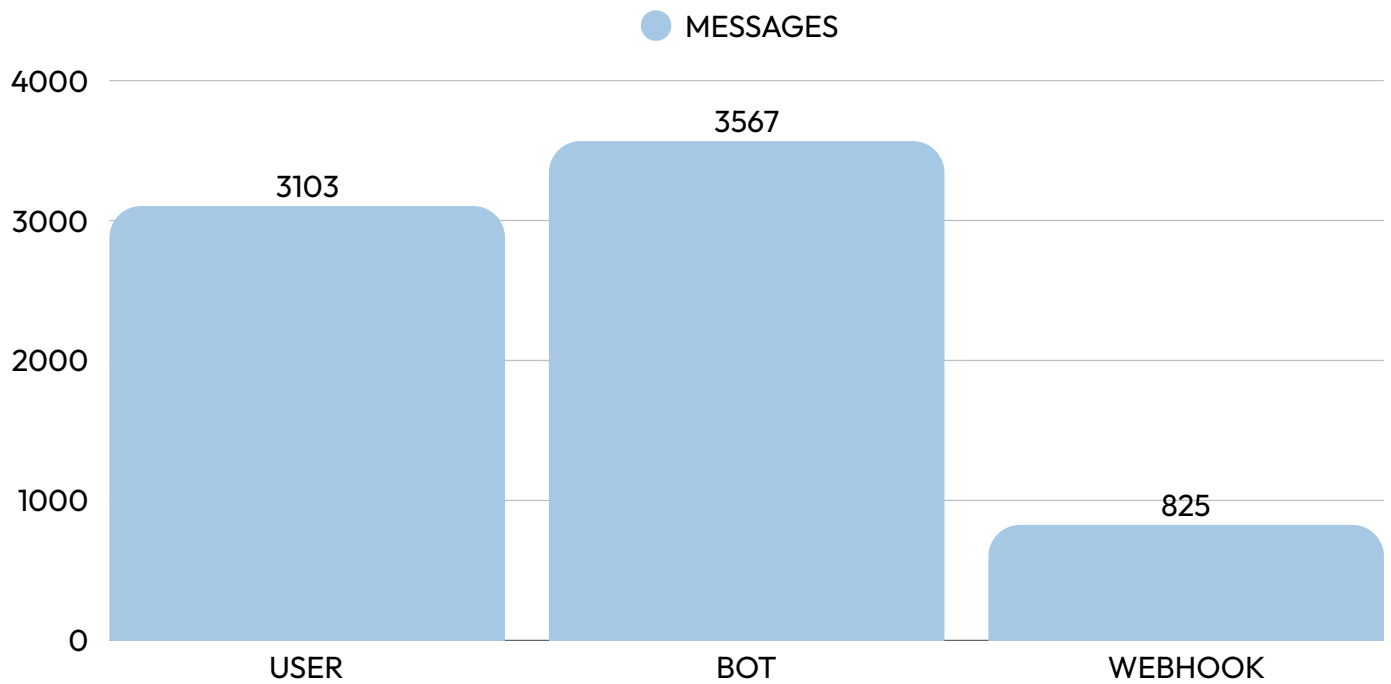

In March, the way team statistics are calculated continued to ensure accurate representation, with each person counted only by their highest role. During the month, a new team member joined, further strengthening the structure. The current team still includes 16 people working on BrainlyLab.

COMPARISON (MESSAGES)

OVERALL REPORT

This report concludes one of the strongest months of organizational and technical development within Brainly HQ since the appointment of the new management board. In March, the server recorded a total of 7,495 messages, including 3,103 user messages, 3,567 bot messages, and 825 webhook messages, highlighting high activity levels and the growing role of automation. This was largely driven by the full deployment of Brainly Core, which became the central system supporting moderation, recruitment, and engagement across the server.

From a structural perspective, the team remained clearly defined, with all statistics calculated according to each member's highest role. At the end of March, the ecosystem consisted of 13 core members: 6 moderators, 3 administrators, and 4 members of management. During the month, one new moderator joined the team, while one administrator and developer left the project. At the same time, development of Brainly Lab continued steadily, with 16 people actively contributing to the mini-games platform.

Overall, March stands out as a milestone month marked by real, implemented changes rather than plans. The successful rollout of Brainly Core and the parallel growth of Brainly Lab position this period as one of the best in Brainly HQ's recent history, setting a strong foundation for even greater progress in the months ahead within the Brainly ecosystem.
