

BRAINLY

CONSOLIDATED REPORT
MAY 2026

BRAINLYHQ

INTRODUCTORY REMARKS

May 2026 was one of the most significant months in the history of BrainlyHQ. Community activity reached an unprecedented level, with over 83,000 messages sent during the month - a new all-time record. This result alone exceeded the total number of messages sent throughout the entire previous year, highlighting the remarkable growth and engagement of the community.

The month began with a special event celebrating the milestone of 1,000 community members. Throughout May, several major events took place, including the regular Piggy Bank event, XP Busters, and the beginning of the largest event in BrainlyHQ's history, which continues into the following month and has already attracted significant community participation.

BrainlyHQ also experienced substantial organizational growth. The team expanded to 18 members, a new board member joined the organization, new positions and structures were introduced, and numerous partnerships were established to support future development and strengthen the overall ecosystem.

May marked the official launch of Science Scavengers, while both the server and the bot received new improvements, features, and quality-of-life updates. The launch of the official Partner Program was also announced for June 10, representing another important milestone for the project.

BRANDS / PRODUCTS

BRAINLY CORE

Brainly Core is the official, fully operational bot that acts as the central system of the Brainly server, fully replacing earlier experimental solutions. There is no beta or test version - Brainly Core runs exclusively in a stable production environment, with all features active and verified. It includes a complete BrainlyCoins economy, a wide range of functional and moderation tools, and a fast, streamlined recruitment system that allows users to progress efficiently. The bot is continuously developed with stability and performance in mind, providing a reliable foundation for everyday server operations and long-term community growth.

BRAINLY LAB

BrainlyLab is a platform for games and mini-games that allows users to personalise their profiles and earn BrainlyCoins. The project has educational value and is currently under development.

BRANDS / PRODUCTS II

SCIENCE SCAVENGERS

One of the most extensive and ambitious projects to appear on the server. Currently, over 150 unique science-related items are already available - from biology and chemistry to technology, astronomy, and more advanced technical objects. Each item has its own description and graphic, making the entire system not just about economy or collecting, but also a form of discovering knowledge! This allows players to seamlessly blend daily gameplay with an immersive, educational adventure.

- ✓ Improved server rules and guidelines
- ✓ Optimized channel permissions
- ✓ Improved server organization
- ✓ Enhanced moderation tools (mod-panel)
- ✓ Improved onboarding for new members
- ✓ Implemented technical improvements

PARTNERSHIP PROGRAMME

**READY TO
SCALE UP?**

BRAINLY LAB

In May, BrainlyLab temporarily paused its primary projects to focus on supporting the rapid development and expansion of the server. During this period, the team was reorganized into two divisions: Core, responsible for concepts and planning, and Forge, focused on programming and technical development. Starting in mid-June, BrainlyLab will return to its core responsibilities and long-term development goals.

**EVERY LESSON MOVES
YOU FORWARD.**

BRAINLY LAB

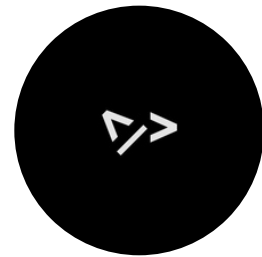

BrainlyLab is made up of a wonderful team of 11 people - users, moderators, ambassadors, and freelancers. Join the server and check out what we are creating!

RECRUITMENT TO BRAINLYLAB WILL START WITH JUNE!

MODERATORS & ADMINS

BRAINLYHQ TEAM - MAY

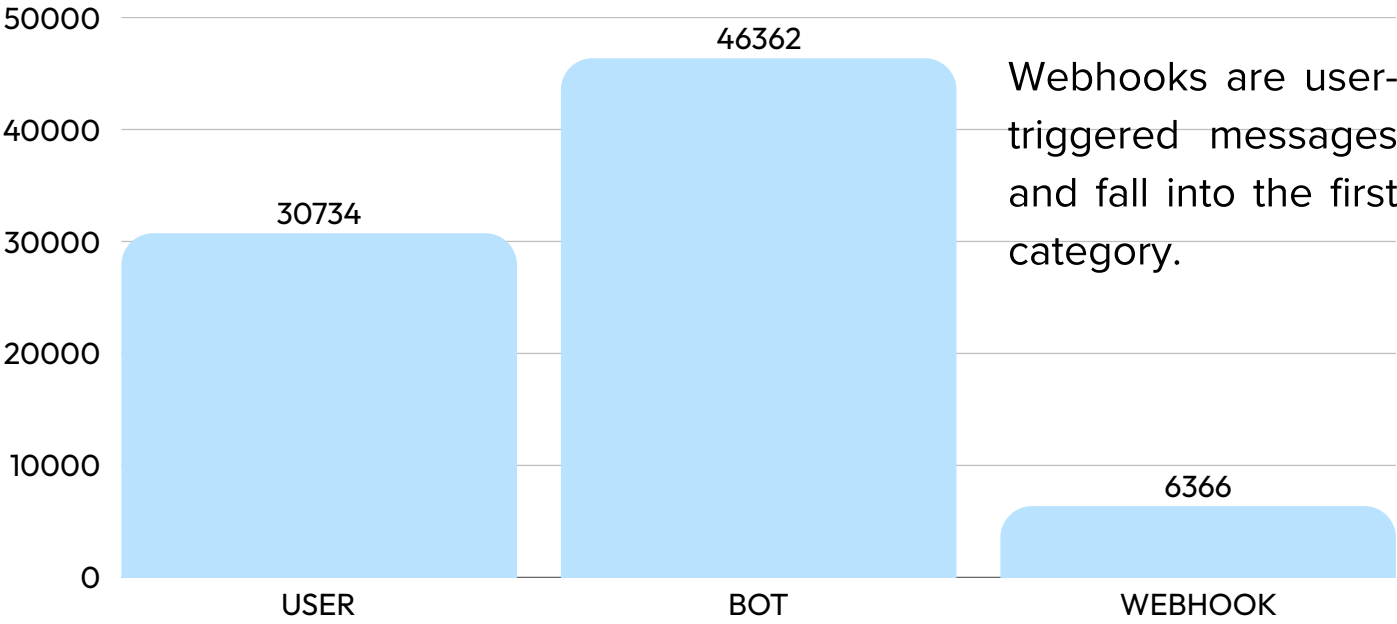

In May, team statistics followed the same precise calculation method, but our overall numbers saw a significant increase. Oskar officially joined the management board, and we introduced specialized roles including Data Analyst, Management Assistant, Social Media Master, and Publicist. Due to the rapid expansion of our team, official recruitment was successfully closed at the end of the month. This restructuring allows us to better support our growing community and streamline internal operations for the upcoming months.

OVERALL REPORT

This report summarizes an exceptionally vibrant month of community engagement and technical development within Brainly HQ, driven by massive activity and record-breaking engagement. During this period, the server recorded an unprecedented total of 83,462 messages, showcasing the incredible vitality of our community. This total includes 30,734 user messages and 46,362 bot messages, alongside 6,366 webhook messages, which are often automated actions directly triggered by user commands. In terms of content, 3,961 messages contained attachments, while 79,501 were standard text-based discussions.

Alongside these remarkable communication records, the month was defined by a wave of structural successes across our primary platforms. The continuous refinement of automated services and core infrastructure has successfully streamlined workflows and opened up new avenues for user interaction.

Ultimately, this massive influx of data and activity highlights the effectiveness of our expanded management framework. With specialized roles now firmly in place, the team remains highly capable of maintaining stability during peak activity, ensuring that the community is ready to sustain this incredible energy!
